Campus Placement & Internship Pipeline — Problem Statement #03

Use Case: UC-02 — Apply to Drive

Primary Actor: Student Applicant

Includes: UC-03 (Check Eligibility)

Preconditions

- The Student Applicant is logged in and has already uploaded and parsed a resume (UC-01).
- At least one corporate drive is active and published with defined eligibility criteria (UC-04).

Postconditions

- If eligible: an application record is created and linked to the drive, and the applicant is added to the Round-1 interview queue.
- If ineligible: no application record is created, and the applicant is shown the specific discrepancy reason(s).

Main Success Scenario

- 1. Student Applicant selects a drive to view from the list of active, eligible drives.
- 2. System displays the drive details: company, role, eligibility criteria, and package.
- 3. Student Applicant selects "Apply".
- 4. System invokes UC-03 (Check Eligibility) using the applicant's latest CGPA, backlog count, and parsed resume skill tags against the drive's rules.
- 5. System confirms the applicant satisfies all eligibility rules.
- 6. System creates the application record and links the applicant to the drive's applicant pool.
- 7. System adds the applicant to the Round-1 interview queue.
- 8. System displays a confirmation message with an application reference number.
- 9. Use case ends successfully.

Alternate Flow

5a. Eligibility Check Fails

- 5a1. System identifies at least one violated criterion (e.g., an active backlog or CGPA below threshold).
- 5a2. System displays a rejection message listing the specific discrepancy reason(s).
- 5a3. No application record is created; the applicant may browse and apply to other eligible drives.
- 5a4. Use case ends.
